ASL is an independent geo-environmental consultancy that has been operating across the UK since 2005. The services we provide include:

- **Site investigation with ground gas monitoring and risk assessments**
- **Gas protection design support and advice in accordance with British Standards and guidance**
- **Independent verification of gas protection design to CIRIA C735**
- **Independent validation of gas protection installation**

We have extensive experience in all types of projects from single residential dwellings to major residential developments and public sector, industrial and commercial properties. Staff are trained to NVQ Level 4 in the Verification of Ground Gas Protection Systems.

ASL has been a member of the British Verification Council since its inception and is a member of the Radon Council.

We pride ourselves in providing a professional and effective service to all our clients to
