Member Description

RSK is a global leader in the delivery of sustainable solutions with a fairly of more than 200 environmental, engineering and technical services.

As an independent gas-protection-system verifier, RSK Geosciences has a nationwide team of specially trained, experienced and competent geoenvironmental engineers to carry out our specialist services, independent from any membrane installation company, across the UK

We offer a full suite of services, from detailed visual and mechanical inspection through to air-lance testing and dielectric (spark) testing.

Our experienced and highly qualified ground gas team are able to help or advise with all ground gas related issues

Qualifications

Working towards NVQ4 and TGPV
